Six months ago Marty and Grace's world was turned upside down. Marty's parents disappeared in a South American jungle after their helicopter went down, and Grace discovered that their Uncle Wolfe is actually her father. Travis Wolfe is a veterinarian, oceanographer and cryptid hunter. He has made it his life's work to try and track down those creatures that are shrouded in mystery and that may or may not be real. After finding real dinosaur eggs in the Congo, Wolfe is now on a quest to capture the elusive giant squid — alive. Wolfe, Marty, Grace and Marty's best friend, Luther, set out for the South Pacific...but it won't be smooth sailing; their ship is rumoured to be haunted and someone on board is determined to stop them from finding the squid. Something smells fishy and it's up to Marty and Grace to find out what's going on before all of them end up at the bottom of the sea!
